Local Market and Home Garden Vegetable Varieties

LOCAL MARKET AND HOME GARDENERS frequently are misled by advertisements of vegetable varieties. Varieties adapted to other areas of the United States may not be suitable in Texas. Hence, only varieties which have been shown to be adapted to Texas conditions should be planted.

The following revised list of recommended varieties for local market and home gardeners was compiled by vegetable workers of the Texas Agricultural Experiment Station and Texas Agricultural Extension Service.¹ Decisions were based on recent research results and field observations.

Bean, bush

Contender
Topcrop*
Resistant Asgrow Valentine
Cherokee Wax (yellow)

Bean, pinto

Varieties available locally.

Bean, pole

Ky 191 (white seeded)
Stringless Blue Lake*
McCaslan (central Blackland)

Bean, lima, bush

Jackson Wonder*
Henderson Bush*
Forkhook 242*

¹Research and Extension personnel are grateful to representatives of the Texas Seedmen's Association for their assistance in compiling this revised list of recommended varieties.

*Preferred for processing.
